

Torque Sensor

Mini-Smart Torque Sensor

Type 4502A... torque sensors operate on the strain gage principle and supply an analog output signal of 0 ... ±5 VDC which is contactless transferred. Available also with integrated rotational angle-/speed measurement.

- Smart (integral measuring electronics)
- Highly fail safe due to active torque output (±5 VDC), electrically isolated from supply and measuring signal
- Non-contact signal transfer
- Unipolar supply
- Highly responsive to dynamic peaks
- Maintenance-free
- Standardized mechanical connections:
 - 1/4" hex socket DIN3126
 - Square socket (size depending on measuring range)
 - Cylindrical shaft ends
- Extremely compact
- Suitable for pulse tool operation
- Conforming to CE
- Optional rotational angle measurement

Description

The Mini-Smart torque sensor uses strain gage technology. The torque signal is transmitted from the rotating shaft via frequency modulation and is processed as an analog signal.

The rotational angle signal with two tracks of each 360 pulses per revolution and track is available as TTL-signal. An external electrical calibration input is standard.

Application

The Mini-Smart torque sensor with rotating measuring shaft is suitable both for dynamical detection of starting torque and breakaway torque for bolting and assembly techniques and for quality assurance in production and laboratory.

Due to its standardized connections the device can be quickly adapted to air, electronic and pulse tools.

Version Q/QA

Version H/HA

Version R/RA

Version RAU

Technical Data

Mechanical Basic Data

Measuring range (nominal torque)	lbf-ft	0.37 ... 737.6
Overload capacity		
Service torque		1.5 x rated torque
Limiting torque		1.5 x rated torque
Rotational angle/- speed measurem. (Version QA, HA, RA, RAU)	pulses/ revolut.	2x360, 90° displaced, TTL
Nominal speed		
≤13.3 lbf-ft	rpm	12,000
14.8 ... 118 lbf-ft	rpm	9,000
184.4 ... 737.6 lbf-ft	rpm	7,000
Version QA, HA, RA, RAU (rotational angle measurement)	rpm	7,000
Housing material		Anodized aluminum
Protection class		IP40

General Electrical Specifications

Accuracy class	VDC	0.2
Linearity error		
including hysteresis	% FSO	<±0.2
Output signal (rated value)	VDC	±0 ... 5
Temp. influence on the zero point	% FSO/°F	<±0.008
Temp. influence on the nominal value	% FSO/°F	<±0.008
Control signal	%	100 ±0.2
100 % control input	VDC	"ON" >3 (max. 30) "OFF" <1.5
Operating temperature range (Rated temperature range)	°F	50 ... 140
Service temperature range	°F	32 ... 158
Storage temperature range	°F	-13 ... 176
Electrical connection		12 pin built-in connector
Supply voltage	VDC	11 ... 26
Power consumption	W	<1

Dimensions

Torque sensor with standard square socket connection

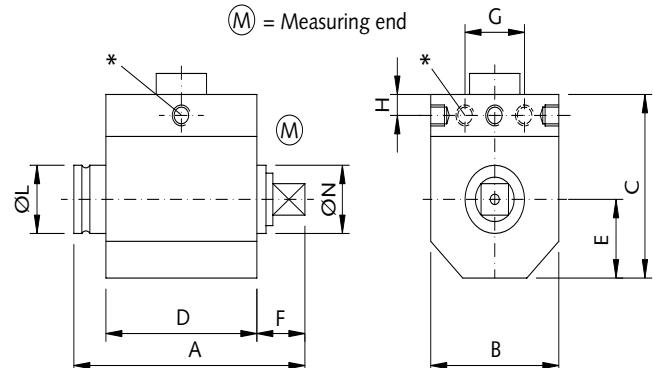

Version Q

- With rotating shaft
- Drive - square socket
- Output - square drive
- Pulse-tool suited, oilproof design (optional)
